## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-9, 11-15 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Dyer' 182.

The Dyer reference discloses a fueling nozzle comprising a retaining device having a spout connection 12 with both a collar portion (unlabeled) and a plate portion (proximate reference numeral 20 in Fig. 3) and a resilient member 18.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Mohr, Braun et al., and Lucero et al. references pertain to dispensers with various spout connections to inlet openings.

Claims 4, 10 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
